

Access Control Magnetic Lock Electric Bolt Electric Strike

PAS-9930PE/PM

Standalone Access Controller

Features

- Support network or standalone operation.
- Memory capacity 1,024 cardholders / 800 events.
- Watchdog function secures system free from halting.
- Able to connect external slave reader type T1/T2.
- Conditional Unlock Door function, able open 1~9,999 seconds per time.
- Provide RS-485 communication, able expandable to 64 sets by RS-485 interface.
- Reader tamper proof detection and door tamper alarm. Programmable door sensor detection time from 1~600 seconds and able set relay or reader beep of alarm type.
- Slim, stylish design, sensitive touch keypad with blue backlight suit for various locations
- Duress card / code setting. When door opened in the emergency, controller will send signal to control center at the same time for tracing and rescue.
- Unique ID or Block reading format supported and programmable key value. (PAS-9930PM)
- Support swipe card and card with pin codes enter modes and door relay time from 1~600 seconds.

Door Lock

Features

- Memory buffer 90% full warning.
- Bell key design. Suit for various location.
- Support network or standalone operation.
- Casing tamper proof detection and door tampers alarm.
- Support swipe card and swipe card with pin codes enter modes.
- The memory of the standard model is 18,000 cardholders and 18,000 events.
- Another model with 170,000 events storage is available for optional purchase.
- Unique ID or Block read format supported. (PAS-970PM)
- Slim, stylish design with waterproof sensitive touch keypad with blue backlight.
- Built-in RS-485 & TCP / IP communication interface to PC. (Able to expand to 255 sets by RS-485 interface)
- Blacklist and Duress card/code setting. When door opened in the emergency, the controller will send signal to control center at the same time for tracing and rescue.
- Programmable disarm code and able set maximum attempts to trigger re-swipe card alarm. The controller time-out function will avoid intrusion in and has self
- Provide 50 sets guest card with configurable check digits, duration, usage time & frequency.
- Provide 32 working shifts and 32 siren output. LCD will display current shift and activate alarm. Provide 100 holiday schedules per year.
- Able to connect external slave reader, And support anti-passback to every single
- Provide 128 time zones and time schedules, 8 time conditional unlock door schedules. (per week)
- Display name on the LCD screen after swiped card. Function keys of access control and shifts which are convenient to personnel to generate time attendance
- On-board lithium battery ensures data storage can reach up to 1 year upon power outage.

Standalone Fingerprint Access Controller

Features

- · Support network or standalone operation.
- Bell key function design. Suit for various location.
- · Casing tamper proof detection and door tamper alarm.
- Slim, stylish design, sensitive touch keypad with blue backlight.
- Dual card / fingerprint contrast function, improve system security.
- High security, using encryption with random code to saving finger characteristic.
- Large LCD display time, date, weekday and company name. And show cardholder Chinese / English name, card number and after card swiped.
- The standard model can access 950 users with 2 fingerprint templates per each user (total 1,900 fingerprint templates). The storage event record is up to 18,000 events.
- The advanced model can access 4,750 users with 2 fingerprint templates per each user (total 9,500 fingerprint templates). Another model with 170,000 events storage is available for optional
- Quick and accurate fingerprint verification, supports 1:1 authentication & 1:N identification. And audible voice prompts guiding users during verification process.
- Provide 32 working shifts and 32 siren schedules. Able display current shift or active alarm. Provide 100 holiday schedules per year.
- Provide blacklist and 50 sets visitor card with configurable check digits, duration, usage time &
- Provide 128 time zones and time schedules, 8 time conditional unlock door schedules (per week).
- Duress card/code setting. When door opened in the emergency, controller will send signal to control center at the same time for tracing and rescue.
- Programmable disarm code and max. re-swipe card alarms function. The system wills timeout at max swipe card failure.
- Memory buffer full warning. When memory capacity reaches 90%, it will send an alarm to remind the system administrator for data collection.
- Unique ID or Block read format supported and programmable key value. (PAS-970PMF)
- RTC ensures to provide correct date and time. Watchdog function secures system free from
- Built-in RS-485 & TCP/IP communication interface to PC. (Able to expandable to 255 sets by RS-485 interface)
- On-board lithium battery ensures data storage can reach up to 1 year upon power outage.

PXR-9970MSKL Reader

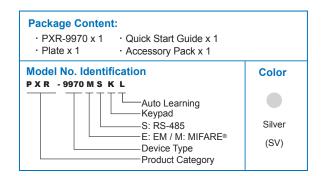

Features

- Conforms to ISO 14443A, supporting MIFARE card.
- Unique ID or Block read format supported and programmable key value.
- Provides RS-485 communication interface. It may suit for long distance installation.
- IP65 rated, easy to install indoor and outdoor environments.
- Slim, stylish design, capacitive touch keypad with blue backlight.
- Provides unlock door modes by swiping card, swiping card with PIN code, press card number through keypad and press exit button
- Provides the bell key for connecting an external doorbell device
- In the Ready mode, LCD displays date, day of the week, time; while swiping card, it displays status message or cardholder's name
- Automatically detects the connection status with the control panel. When disconnecting
 with the control panel, it automatically turns into standalone mode and stays operation by
 emergency management cards or Auto-Learning mode
- Provides Auto-Learning function to automatically remember 470 swiped card numbers.
 While disconnecting with the control panel, the reader will turn into standalone mode for operation
- Case sensor detection function.
- · Watchdog function secures system free from halting.

Face Recognition Access controller

Features

- Provide 4,000 faces (1 face template per user), 80,000 cardholders and 100,000 event records.
- Quick and accurate face verification; supports 1:N authentication. And audible voice prompts guiding users during verification process.
- Casing tamper proof detection and door tamper alarm.
- Blacklist and Duress card/code setting. When door opened in the emergency, the controller will send signal to control center at the same time for tracing and rescue.
- Support anti-passback to a single door.
- Provide256 time zones and time schedules, 8 time conditional unlock door schedules (per week).
- Provide 32 working shifts and 32 siren schedules. Able display current shift or active alarm. (Work with ACU-30). Provide 100 holiday schedules per year.
- Built-in TCP/IP communication interface to PC.
- Equipped with 2.4"color LCD and waterproof sensitive touch keypad with blue backlight.
- In standby mode, LCD screen display date and large font of time (HH:MM).
- Memory buffer full warning. When the remaining memory capacity can only store 1000 records, the LCD will display that 99% of the memory is full, reminding the administrator to collect data.
- Support remote control function.
- On-board lithium battery ensures data storage can reach up to 1 year upon power outage
- RTC ensures to provide correct date and time. Watchdog function secures system free from halting.
- Conforms to ISO 14443A standard; supporting Mifare card. (Mifare model only)
- Unique ID or Block read format supported and programmable key value. (Mifare model only)

PAS-9400/N

TCP/IP MULTI DOOR CONTROL PANEL

Features

- Provide 1 Relay output for activate alarm.
- Built-in TCP / IP communication interface to PC.
- There are three models, controls 4 / 8 / 16 doors.
- Large capacity: 30,000 cardholders / 100,000 events.
- Provide optical coupled isolated sensors for alarm and reader tamper.
- Control panel and reader separate design, max. connects 16 RS-485 L-series readers or ACU-100 slave control panels. (for T2/W26 reader used). (Able set two-way readers or reader in and exit button out).
- Provide 256 time zones & schedules, each 8 time zones. 64 holiday groups, 100 holiday schedules per group.
- Support Blacklist, Patrol Card so on, also can set up cards valid date, increase the safety of Access Control.
- Anti-passback and Duress card/code setting. When door opened in the emergency, controller will send signal to control center at the same time for tracing and rescue.
- RTC (Real Time Clock) and Watchdog function ensures accurate date/time and system free from halting.
- Support connects extra PSU-330 Uninterrupted power supply, ensure the operation during power outage.
- Control panel holder & block terminal ensure easy installation & easy maintenance.

BSI MAGNETIC LOCK

Electromagnetic locks are widely used in commercial and industrial applications. The lock is usually mounted on the header above the door and the armature is usually mounted on the door.

BSI provides full line of electromagnetic locks for all types of doors. Our models are designed to secure any type of door or gate that closes against a fixed stop. All of our locks components are carefully designed, manufactured and tested to ensure superior quality.
